

BMW Motorrad Dealer Database

Version 16.00 (2021 data)

Instructions for uploading the database to a BMW Motorrad Navigator VI using Microsoft Windows.

- 1) Connect the GPS via the USB cable to an open USB port on your computer. Turn on the GPS unit.
- 2) If your computer asks for a driver, please download and install the USB driver from Garmin's website at www.garmin.com. The driver can be found by selecting "Software" from the "Support" menu and then selecting "Additional Software" and "USB Drivers".
- 3) Once the computer recognizes your GPS device, a new window should pop up showing the GPS storage drive. If no window pops up, simply double click on the "My Computer" icon on your desktop and double click on the drive displaying "BMW Navigator VI".
- 4) Within the "BMW Navigator VI" drive, open the "Poi" folder within the "Garmin" folder. This is where the updated database will be copied.
- 5) Locate the downloaded dealer database file named D0743030K.gpi. Highlight the file and select Edit > Copy.
- 6) Go back to the "Poi" folder within the GPS unit's drive and paste the database file by selecting Edit > Paste. (Note: You can also drag and drop files to and from your drives.)
- 7) Within the "Poi" folder, delete older dealer database files with the names D0743030A.gpi, D0743030B.gpi, D0743030C.gpi, D0743030D.gpi, D0743030E.gpi, or D0743030F.gpi, D0743030G.gpi, D0743030H., gpiD0743030I.gpi., D0743030J.
Do not delete other gpi files.
- 8) Safely remove the GPS device from your computer.

The BMW Motorrad dealer database for the BMW Motorrad Navigator VI has now been updated to version 15.00.

Please be aware that the Navigator VI will report version 15.00 of the dealer database. If you experience difficulty loading the database to your BMW device or for any additional help with this process, please visit the "Managing Files" and "Troubleshooting" sections in the GPS unit's owner's manual.
