[Karte]

Position N 48.74131 E 10.37167

weicht merklich von der
gewünschten Position ab

Position als Wegpunkt ?

Variante 2:

Neue Position ohne Wald

Position N 48.74071 E 10.34237

Neue Position ohne Wald

als Wegpunkt 112

Position N 48.74071 E 10.34237

korrekt

Neue Position 112 ohne Wald

Position N 48.74071 E 10.34237

korrekt

Position als Wegpunkt ?

Variante 3:

Neue Position mit Wald

Position N 48.73651 E 10.34441

Nach (ENTER)

als Wegpunkt /Abbiegung

Position N 48.74131 E 10.37167

scheint ein Wert aus einem Speicher zu sein ?

Nach [Speichern]

als Wegpunkt /A 9

Position N 48.74131 E 10.37167

Position als Wegpunkt ?

Resultat:

als Wegpunkt /A 9

Position N 48.74131 E 10.37167

nicht korrekt

Creating Waypoints Using the Map

You can quickly create a waypoint using the Map Page. When you pan the map and move the arrow over a map item, you see a highlighted description of the item.

To create a waypoint using the Map Page:

1. On the Map Page, use the **ROCKER** to move the pointer to the map item you want to mark as a waypoint.
2. Press and quickly release **ENTER** to capture that location and open the information page for the map item.
3. Highlight **Save**, and press **ENTER**.

If the map item selected contains no information, a "No map information at this point. Do you want to create a user waypoint here?" message appears. Highlight **Yes**, and press **ENTER**.

4. To change any information on the Waypoint Page, highlight the appropriate field, and press **ENTER** to open the on-screen keypad. After entering and confirming your changes, highlight **OK**, and press **ENTER**.

Creating a Waypoint Using Coordinates

You can manually enter location coordinates to create a waypoint. This method is useful for creating a waypoint at a specific latitude/longitude position from a chart.

To create a new waypoint by entering location coordinates:

1. Create a new waypoint, press **MARK**.
2. On the Waypoint Page, highlight the **Location** field, and press **ENTER** to open the on-screen keypad.
